

PRODUCTION PERFORMANCE & QUALITY REPORT

Facility: Main Manufacturing Plant Reporting Period: Weekly Summary

Executive Summary:

As Deva, the Maintenance Assistant, I have reviewed the machine data from Query_1 containing 28 total records. The dataset displays machines across various statuses including Active, Idle, and Maintenance. Temperature, vibration, and runtime hours data fields are currently unpopulated in this table view.

1. Weekly Production Trends

[Chart Missing]

Production Analysis:

The Query_1 table provides machine registry and status information rather than work order records. Out of the 28 recorded items, multiple units are currently in Maintenance mode such as Machine ID 11 (CNC 5-Axis #1), 18 (Hass VF-10), 19 (Haas VF-123), and 29 (Haas HC-5). Several units are marked as Idle while others operate under Active status.

Day	Target	Actual	Status
-----	--------	--------	--------

2. Machine Performance (OEE Breakdown)

OEE Overview:

No CapacityAnalysis data was provided in the database tables, meaning machine utilization percentages are currently unavailable for calculating exact OEE metrics.

[Chart Missing]

Line	OEE Score	Status
------	-----------	--------

3. Rejection vs. Production Volume by Shift

[Chart Missing]

Shift Efficiency Analysis:

No WeighingMachine data was provided in the database tables to analyze shift-wise production output or rejections.

Shift	Output	Rejections	Defect Rate
-------	--------	------------	-------------

4. Scrap Analysis & Waste Distribution

Key Scrap Drivers:

No Scrap table data was provided in the database to analyze specific scrap causes or categories.

[Chart Missing]

5. Corrective Action Plan

Action Item	Target Area	Owner	Deadline
Schedule comprehensive diagnostic check for machines currently under Maintenance status	Maintenance Department	Maintenance Team	2026-05-01
Audit and populate missing runtime, temperature, and vibration telemetry fields in the database	Data Systems	IT / Maintenance	2026-05-05
