

PRODUCTION PERFORMANCE & QUALITY REPORT

Facility: Main Manufacturing Plant Reporting Period: Weekly Summary

Executive Summary:

The manufacturing facility recorded a total of 2 work orders, comprising 1 completed order with 1,000 completed units against a planned 1,000, and 1 planned order with 500 planned units. Machine utilization across 5 monitored machines averaged between 75.0% and 103.3%. Overall shift production achieved 9,250 finished goods units with 225 rejections and 123 scrap units.

1. Weekly Production Trends

Production Analysis:

Work order performance shows 1 completed work order achieving 100% fulfillment with 1,000 completed units out of 1,000 planned. An additional work order remains in 'Planned' status with 500 planned units and 0 completed units, reflecting upcoming manufacturing tasks scheduled for execution.

Day	Target	Actual	Status
Completed Work Order	1000	1000	On Track
Planned Work Order	500	0	Below Target

2. Machine Performance (OEE Breakdown)

OEE Overview:

Machine utilization analysis reveals varied performance across the 5 stations. Assembly Station #1 and CNC Mill #1 lead with high utilization rates of 103.3% and 97.5% respectively, while Auto Assembly Line, CNC Lathe #1, and CNC Lathe #2 operate between 75.0% and 88.3%.

Line	OEE Score	Status
Assembly Station #1	103.3%	Optimal
Auto Assembly Line	80.0%	Below Target
CNC Lathe #1	88.3%	Optimal
CNC Lathe #2	75.0%	Below Target
CNC Mill #1	97.5%	Optimal

3. Rejection vs. Production Volume by Shift

Shift Efficiency Analysis:

Shift-level tracking captured a total output of 9,250 finished goods units alongside 225 rejected units and 123 scrap units. This results in an overall defect rate of approximately 2.4% based on total produced and rejected quantities.

Shift	Output	Rejections	Defect Rate
Default Shift	9250	225	2.4%

4. Scrap Analysis & Waste Distribution

Key Scrap Drivers:

Scrap analysis across 7 material types indicates a total scrap quantity of 123.0 units. HDPE Container 5L represents the highest scrap contributor at 24.4%, followed by HDPE Drum 20L at 20.3% and PET Bottle 500ml at 16.3%.

5. Corrective Action Plan

Action Item	Target Area	Owner	Deadline
Investigate flash defects causing high rejections on HDPE Cap 28mm	HDPE Cap 28mm Production	Quality Control	2023-12-31
Address low utilization on CNC Lathe #2 and Auto Assembly Line	Machine Operations	Production Management	2023-12-31
