

PRODUCTION PERFORMANCE & QUALITY REPORT

Facility: Main Manufacturing Plant Reporting Period: Weekly Summary

Executive Summary:

The manufacturing production report summarizes performance across 2 total work orders with a total planned quantity of 1500.0 and 1000.0 completed units. Currently, 1 work order is completed while 1 remains planned with 0.0 completed units. Overall execution reflects steady progression in completed tasks against current operational planning.

1. Weekly Production Trends

Production Analysis:

Analysis of actual work order records shows two entries categorized by status. The completed work order achieved a planned and completed quantity of 1000.0 units. The planned work order has a target quantity of 500.0 units with 0.0 units completed so far.

Day	Target	Actual	Status
Completed	1000	1000	On Track
Planned	500	0	Below Target

2. Machine Performance (OEE Breakdown)

OEE Overview:

No CapacityAnalysis data was provided in the dataset to calculate machine utilization percentages.

[Chart Missing]

Line	OEE Score	Status
------	-----------	--------

3. Rejection vs. Production Volume by Shift

[Chart Missing]

Shift Efficiency Analysis:

No WeighingMachine data was provided in the dataset to evaluate shift-wise production, rejections, or defect rates.

Shift	Output	Rejections	Defect Rate
-------	--------	------------	-------------

4. Scrap Analysis & Waste Distribution

Key Scrap Drivers:

No Scrap table data was provided in the dataset to determine scrap causes or distribution percentages.

[Chart Missing]

5. Corrective Action Plan

Action Item	Target Area	Owner	Deadline
Initiate resource allocation for the pending planned work order	Planned Work Orders	Production Planning	2023-11-01
Review capacity and weight monitoring logs to establish baseline metrics	Capacity & Weighing Systems	Maintenance	2023-11-05
Implement scrap and rejection tracking protocols across active lines	Quality Control	Quality Assurance	2023-11-10
