

PRODUCTION PERFORMANCE & QUALITY REPORT

Facility: Main Manufacturing Plant Reporting Period: Weekly Summary

Executive Summary:

The manufacturing facility processed a total of 2 work orders comprising 1,500 planned units, with completed production reaching 1,000 units from the completed order. Shift-wise performance recorded 9,250 total finished goods across Shift A, Shift B, and Shift C, alongside 225 total rejected quantities and 123 total scrap quantities. Machine utilization analysis across 5 machines showed average utilization rates ranging from 75.0% to 103.3%.

1. Weekly Production Trends

Production Analysis:

Work order tracking indicates a total of 2 work orders across the facility, split between 1 completed and 1 planned status. The completed work order achieved a planned quantity of 1,000.0 units with an equal completed quantity of 1,000.0 units. The planned work order accounts for 500.0 planned units with 0.0 completed units so far.

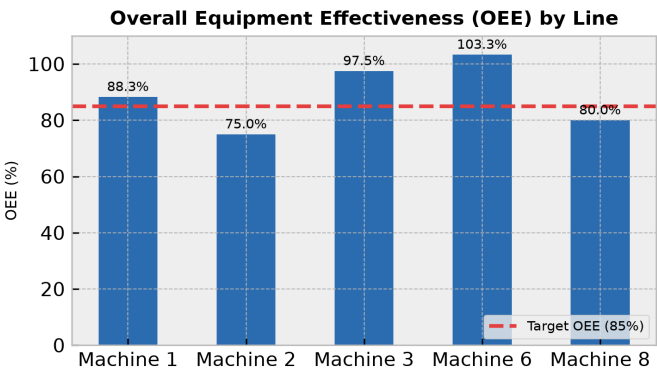

Day	Target	Actual	Status
Completed Order	1000	1000	On Track
Planned Order	500	0	Below Target

2. Machine Performance (OEE Breakdown)

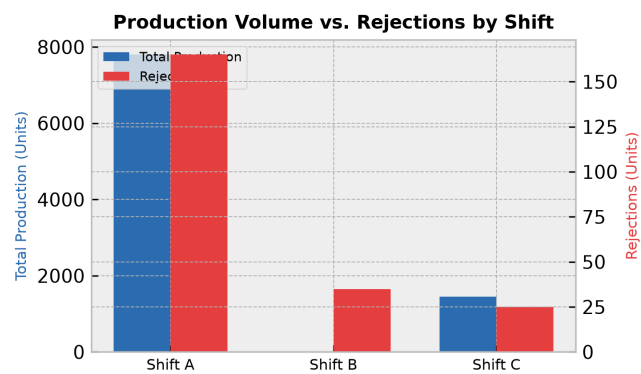

OEE Overview:

Machine utilization data from CapacityAnalysis shows varied performance across 5 active units. Machine 6 leads with 103.33% utilization, followed by Machine 3 at 97.5%, and Machine 1 at 88.33%, all meeting optimal thresholds. Machines 2 and 8 report lower utilization at 75.0% and 80.0% respectively.

Line	OEE Score	Status
Machine 1	88.3%	Optimal
Machine 2	75.0%	Below Target
Machine 3	97.5%	Optimal
Machine 6	103.3%	Optimal
Machine 8	80.0%	Below Target

3. Rejection vs. Production Volume by Shift

Shift Efficiency Analysis:

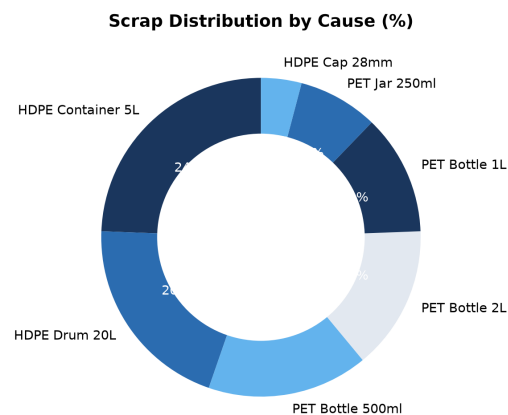

Shift-wise output captured via WeighingMachine data demonstrates that Shift A generated the highest output with 7,800.0 FG units, 165.0 rejections, and 80.0 scrap. Shift C contributed 1,450.0 FG units, 25.0 rejections, and 18.0 scrap, while Shift B recorded 0.0 FG units, 35.0 rejections, and 25.0 scrap.

Shift	Output	Rejections	Defect Rate
Shift A	7800	165	2.1%
Shift B	0	35	N/A
Shift C	1450	25	1.7%

4. Scrap Analysis & Waste Distribution

Key Scrap Drivers:

Scrap analysis across 7 material categories records a total of 123.0 units of scrap. HDPE Container 5L is the highest scrap driver at 30.0 units (24.4%), followed by HDPE Drum 20L at 25.0 units (20.3%) and PET Bottle 500ml at 20.0 units (16.3%).

5. Corrective Action Plan

Action Item	Target Area	Owner	Deadline
Investigate high flash defects on HDPE Cap 28mm causing 100 rejections	Material FG005	Quality Control	2023-11-15
Address low utilization rates on Machine 2 (75%) and Machine 8 (80%)	Machine Operations	Maintenance	2023-11-20
Review Shift B process parameters to resolve zero FG output with active rejections	Shift B Production	Production Management	2023-11-12
