

PRODUCTION PERFORMANCE & QUALITY REPORT

Facility: Main Manufacturing Plant Reporting Period: Weekly Summary

Executive Summary:

The manufacturing facility processed a total of 2 work orders comprising 1500.0 planned units, with 1000.0 units completed and 500.0 units remaining in planned status. Machine utilization across the facility averaged strongly, with peak utilization reaching 103.33% on Machine 6 and a low of 75.0% on Machine 2. Scrap and rejections were distributed across various product lines, led by materials like HDPE Container 5L and HDPE Cap 28mm.

1. Weekly Production Trends

Production Analysis:

The production performance data shows a total of 2 work orders tracked across the period. Specifically, 1 work order with status 'Completed' achieved a planned quantity of 1000.0 and successfully completed 1000.0 units. An additional work order remains in 'Planned' status with 500.0 planned quantities and 0.0 completed units.

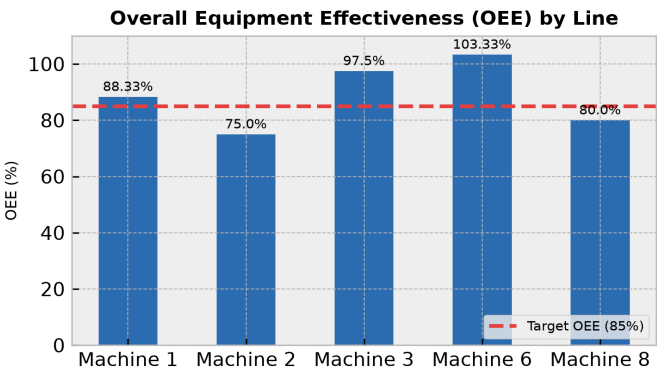

Day	Target	Actual	Status
Completed Order	1000	1000	On Track
Planned Order	500	0	Below Target

2. Machine Performance (OEE Breakdown)

OEE Overview:

Capacity analysis data indicates varying utilization levels across 5 machines. Machine 6 demonstrated the highest utilization at 103.33%, followed by Machine 3 at 97.5% and Machine 1 at 88.33%. Machines 2 and 8 recorded lower utilization rates at 75.0% and 80.0% respectively.

Line	OEE Score	Status
Machine 1	88.33%	Optimal
Machine 2	75.0%	Below Target
Machine 3	97.5%	Optimal
Machine 6	103.33%	Optimal
Machine 8	80.0%	Below Target

3. Rejection vs. Production Volume by Shift

[Chart Missing]

Shift Efficiency Analysis:

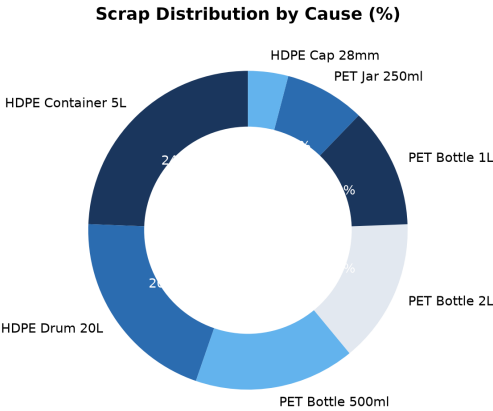

Shift analysis data was not provided in the current records, requiring future integration to assess granular shift-wise outputs, rejections, and defect rates.

Shift	Output	Rejections	Defect Rate
-------	--------	------------	-------------

4. Scrap Analysis & Waste Distribution

Key Scrap Drivers:

Scrap distribution across materials shows HDPE Container 5L contributing the highest scrap quantity at 30.0 units, followed by HDPE Drum 20L at 25.0 units, PET Bottle 500ml at 20.0 units, PET Bottle 2L at 18.0 units, PET Bottle 1L at 15.0 units, PET Jar 250ml at 10.0 units, and HDPE Cap 28mm at 5.0 units out of a total 123.0 scrap units.

5. Corrective Action Plan

Action Item	Target Area	Owner	Deadline
Investigate root cause for low utilization on Machine 2	Machine 2	Maintenance	2023-11-15
Address high scrap rate for HDPE Container 5L	HDPE Container 5L Line	Production	2023-11-20
