

PRODUCTION PERFORMANCE & QUALITY REPORT

Facility: Main Manufacturing Plant Reporting Period: Weekly Summary

Executive Summary:

The manufacturing production report covers a total of 2 work orders, with a total planned quantity of 1500.0 and a completed quantity of 1000.0 across the facilities. Machine utilization shows peak efficiency at Assembly Station #1 with 103.33% utilization and CNC Mill #1 at 97.5%. Total scrap and rejections are tracked across various materials, led by HDPE Cap 28mm with 100.0 rejected units due to flash defects.

1. Weekly Production Trends

Production Analysis:

The work order summary indicates 1 completed work order with a planned and completed quantity of 1000.0, and 1 planned work order with a planned quantity of 500.0 and 0.0 completed. This demonstrates that active production is currently fulfilling completed orders while pending execution on the secondary planned order.

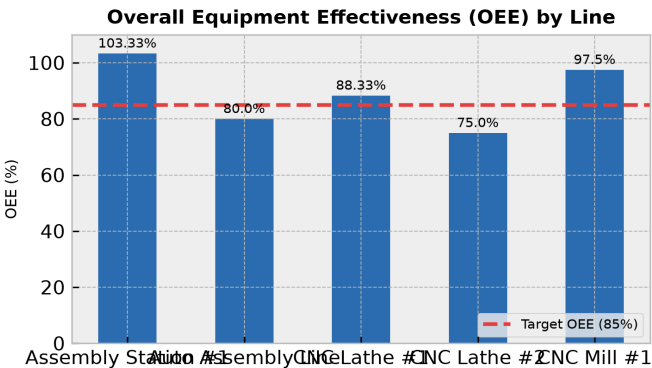

Day	Target	Actual	Status
Completed Order	1000	1000	On Track
Planned Order	500	0	Below Target

2. Machine Performance (OEE Breakdown)

OEE Overview:

Capacity analysis indicates varying performance across 5 machines. Assembly Station #1 and CNC Mill #1 perform at optimal utilization rates of 103.33% and 97.5% respectively, followed by CNC Lathe #1 at 88.33%. Auto Assembly Line and CNC Lathe #2 operate below the optimal threshold at 80.0% and 75.0% utilization.

Line	OEE Score	Status
Assembly Station #1	103.33%	Optimal
Auto Assembly Line	80.0%	Below Target
CNC Lathe #1	88.33%	Optimal
CNC Lathe #2	75.0%	Below Target
CNC Mill #1	97.5%	Optimal

3. Rejection vs. Production Volume by Shift

[Chart Missing]

Shift Efficiency Analysis:

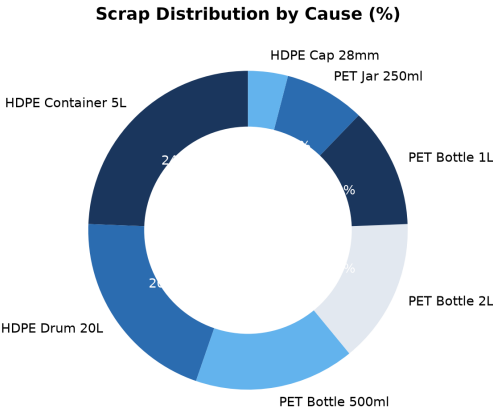

Shift-wise weighing machine data is not present in the current dataset, meaning output and rejections cannot be broken down by shift at this time.

Shift	Output	Rejections	Defect Rate
-------	--------	------------	-------------

4. Scrap Analysis & Waste Distribution

Key Scrap Drivers:

Scrap distribution across materials shows total scrap quantities led by HDPE Container 5L at 30.0 (25.4%), HDPE Drum 20L at 25.0 (21.2%), and PET Bottle 500ml at 20.0 (16.9%). Lower scrap quantities are recorded for PET Bottle 2L at 18.0 (15.3%), PET Bottle 1L at 15.0 (12.7%), PET Jar 250ml at 10.0 (8.5%), and HDPE Cap 28mm at 5.0 (4.2%), totaling 118.0 units.

5. Corrective Action Plan

Action Item	Target Area	Owner	Deadline
Investigate flash defect root cause on molding equipment	HDPE Cap 28mm	Quality Control	2023-11-15
Review scheduling and operator availability for underperforming machines	CNC Lathe #2 & Auto Assembly Line	Production Management	2023-11-20
