

PRODUCTION PERFORMANCE & QUALITY REPORT

Facility: Main Manufacturing Plant Reporting Period: Weekly Summary

Executive Summary:

The manufacturing production report summarizes performance across a total of 2 work orders, with 1 completed and 1 currently planned. Total planned quantity across all work orders stands at 1500.0, while total completed quantity has reached 1000.0. The completed work order achieved full completion, whereas the planned work order has 0.0 completed units so far.

1. Weekly Production Trends

Production Analysis:

Work order analysis shows that work order status is divided between Completed (1 order with 1000.0 planned and 1000.0 completed) and Planned (1 order with 500.0 planned and 0.0 completed). Performance indicates that active production has successfully fulfilled the completed order target.

Day	Target	Actual	Status
Completed	1000	1000	On Track
Planned	500	0	Below Target

2. Machine Performance (OEE Breakdown)

OEE Overview:

No CapacityAnalysis data was provided in the dataset to evaluate machine utilization rates.

[Chart Missing]

Line	OEE Score	Status
------	-----------	--------

3. Rejection vs. Production Volume by Shift

[Chart Missing]

Shift Efficiency Analysis:

No WeighingMachine data was provided in the dataset to evaluate shift-wise production or rejection metrics.

Shift	Output	Rejections	Defect Rate
-------	--------	------------	-------------

4. Scrap Analysis & Waste Distribution

Key Scrap Drivers:

No Scrap table data was provided in the dataset to analyze scrap causes.

[Chart Missing]

5. Corrective Action Plan

Action Item	Target Area	Owner	Deadline
Initiate production on the pending planned work order to meet the 500.0 unit target.	Planned Work Orders	Production Management	2023-11-15
