Machine Performance Report

Report type: Machine Performance

Generated: 2026-09-24T09:39:09.061722+00:00

Data window: 2026-09-23T09:26:33.569567+00:00 – 2026-09-24T09:11:33.569567+00:00 (Asia/Kolkata)

Report ID: rpt_30fd917da3 | Status: success

Report Metadata

Research ID: demo_75313715 | Report version: 1.0 | LLM narrative used: False

Executive Summary

This machine performance report covers 1 data source(s) and 192 record(s). Data quality is 'complete' with 0 warning(s) flagged. 5 KPI(s) were computed deterministically from the underlying data.

Key Performance Indicators

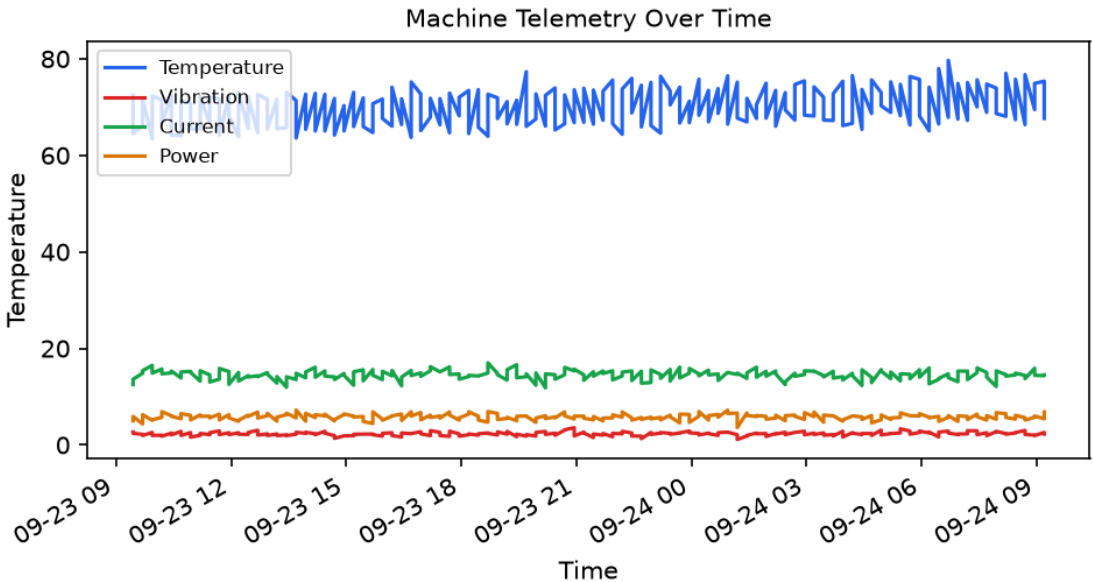

KPI	Value	Trend	Status
Average Temperature (machine_telemetry)	70.059	-6.69% (decrease)	normal
Average Vibration (machine_telemetry)	2.315	-15.67% (decrease)	normal
Average Current (machine_telemetry)	14.499	15.54% (increase)	warning
Average Power (machine_telemetry)	5.808	36.06% (increase)	warning
Average Rpm (machine_telemetry)	1443.906	-6.74% (decrease)	normal

Key Findings

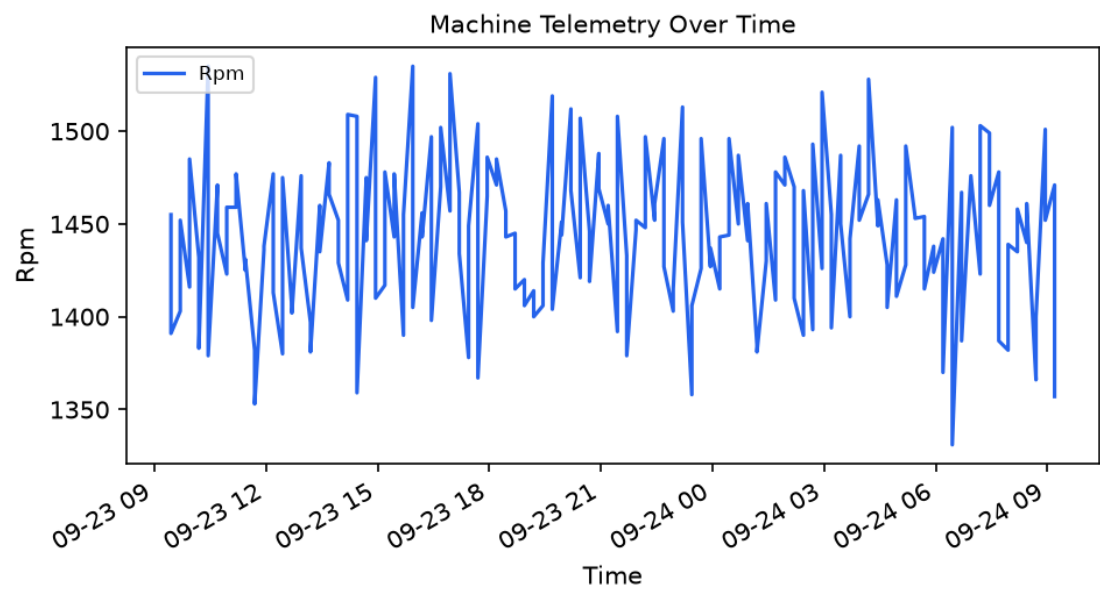

- **Average Current (machine_telemetry) trending up**
Average Current (machine_telemetry) increased 15.54% over the observed window.
- **Average Power (machine_telemetry) trending up**
Average Power (machine_telemetry) increased 36.06% over the observed window.

Recommendations

[LOW] Continue routine monitoring (monitoring)

No immediate action required based on current data.

Data Quality

Status: **complete** | Source records: 192 | Missing values: 0 | Invalid values: 0
No data-quality warnings.

Sources / Provenance

Database	Source	Records	Status
influxdb	machine_telemetry	192	success

Calculation Notes

- All numeric KPIs computed with pandas (mean/median/min/max/std/trend) -- no LLM involved.
- Chart data uses structured objects per point, never stringified coordinate lists.
