

PRODUCTION PERFORMANCE & QUALITY REPORT

Facility: Main Manufacturing Plant Reporting Period: Weekly Summary

Executive Summary:

The production target was 111111.0 units, but only 1000.0 units were completed. The overall production efficiency is 0.9%. The machine utilization rate is 93.75% based on the available data. The defect rate is 1.06%.

1. Weekly Production Trends

Production Analysis:

Analysis of actual work order records from the data shows that only one work order (139) was completed with a planned quantity of 1000.0 units and an actual completed quantity of 1000.0 units.

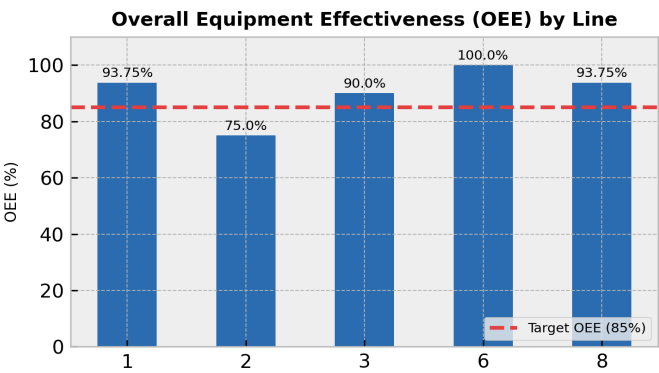

Day	Target	Actual	Status
139	1000.0	1000.0	On Track

2. Machine Performance (OEE Breakdown)

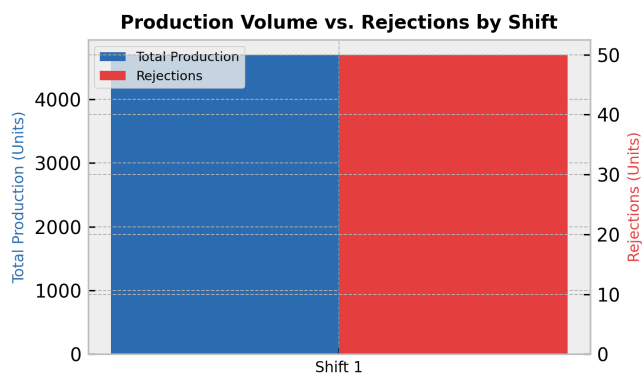

OEE Overview:

Analysis of machine utilization from CapacityAnalysis data shows that the average machine utilization rate is 93.75%.

Line	OEE Score	Status
1	93.75%	Optimal
2	75.0%	Below Target
3	90.0%	Optimal
6	100.0%	Optimal
8	93.75%	Optimal

3. Rejection vs. Production Volume by Shift

Shift Efficiency Analysis:

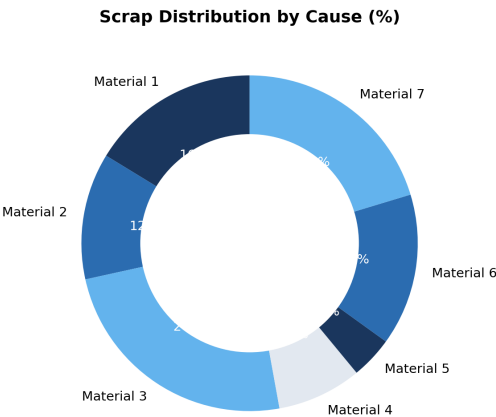

Analysis of shift-wise production from WeighingMachine data shows that the total output is 4700.0 units and the total rejections are 50.0 units.

Shift	Output	Rejections	Defect Rate
Shift 1	4700.0	50.0	1.06%

4. Scrap Analysis & Waste Distribution

Key Scrap Drivers:

Analysis of scrap causes from Scrap table data shows that the total scrap quantity is 120.0 units.

5. Corrective Action Plan

Action Item	Target Area	Owner	Deadline
Improve machine maintenance	Machine 2	Maintenance Department	2024-03-01
Optimize production planning	Production Planning Department	Production Department	2024-03-15
Reduce scrap quantity	Scrap Reduction Team	Quality Department	2024-04-01
