

PRODUCTION PERFORMANCE & QUALITY REPORT

Facility: Main Manufacturing Plant Reporting Period: Weekly Summary

Executive Summary:

The production run has yielded a total output of 0 units, with 0 units rejected and 0 units scrapped, resulting in an overall equipment effectiveness of 0%, and a quality rating of 100% as no defects were reported.

1. Weekly Production Trends

Production Analysis:

Daily output trends indicate a consistent production rate with no notable peaks or slowdowns, however, the production rate is currently at 0 units per day, indicating a possible equipment or operational issue.

Day	Target	Actual	Status
Mon - Wed	0	0	On Track
Thu - Fri	0	0	On Track
Sat - Sun	0	0	On Track

2. Machine Performance (OEE Breakdown)

OEE Overview:

Machine performance is currently at 0% due to a lack of production, with no OEE thresholds breached, indicating potential for improvement once production commences.

Line	OEE Score	Status
Line A	0.0%	Not Operational
Line B	0.0%	Not Operational
Line C	0.0%	Not Operational

3. Rejection vs. Production Volume by Shift

Shift Efficiency Analysis:

Shift efficiency and rejection rates are currently at 0% due to a lack of production, with no notable trends or patterns, indicating potential for improvement once production commences.

Shift	Output	Rejections	Defect Rate
Shift 1 (Day)	0	0	0.0%
Shift 2 (Eve)	0	0	0.0%
Shift 3 (Night)	0	0	0.0%

4. Scrap Analysis & Waste Distribution

Key Scrap Drivers:

Root causes of scrap and defects are currently unknown due to a lack of production, however, potential causes may include dimensional deviations, surface defects, or material flaws.

Scrap Distribution by Cause (%)

5. Corrective Action Plan

Action Item	Target Area	Owner	Deadline
Investigate and resolve production issue	All Machines	Maintenance	Aug 14, 2026
